Pedigree Viewer Crack [Win/Mac]

1. Two modes are available. In the first, an entire pedigree is displayed, a parent view, or a parent view window. In the second, when you point to an animal's box, information about that animal is then displayed to the right. 2. This is a freeware program that runs on computers running Windows 95/98/ME/NT/2000/XP
3. A clipboard version is also available, to save to a file your individual data. 4. Only simple data files can be opened. 5. There is no protection software involved, the program will run with no problems. 6. All features are available in this version. 7. All features are available in all versions. 8. Requires no installation. 9. A free trial version is available, which allows you to use all features for 30 days. 10. Installation note: it is recommended to run the main app first and then the clipboard version. If you run the clipboard version first, you must close the main app before running the clipboard version. Pedigree Viewer-Plus (for Mac OS)
Description: Pedigree Viewer-Plus is a powerful set of tools that will help you save time when working with large pedigrees. By minimizing the amount of time you spend in the "paste and search" stages of your data collection and analysis, you will spend more time doing what you do best - analyzing your data to answer your questions. Here are some of the features: - Blank the clipboard when you're done - Highlight a population of animals - Narrow your search to the current animal - Merge multiple animals into a single - Delete or replace an animal - Generate a unique name for the given animal - Automatically open the desired animal - Automatically move the cursor on a click - Automatically name the new window - Automatically close the unwanted windows PDF Animal Handler Description: PDF Animal Handler is an innovative PDF animal management software designed specifically for animal geneticists, studiers and researchers that are looking for a powerful solution to explore and manage their large PDF files. It enables one to get far more information of an individual animal in a much shorter time as compared to manually entering the information. It has different options such as copy individual animal, replace individual animal, merge animals into one, merge whole sheets into one, view or create macros, view compound or individual traits, view pedigree, view or print pedigree, view compound chart or trait listing, view individual trait, view

Pedigree Viewer PC/Windows

Description: Pedigree Viewer is a small, simple, handy piece of software designed to read your simple data file and displays the full pedigree structure on the screen. Each animal is represented by its identity, or its name, or by its value for any of the traits in the data file. You can display a large pedigree of thousands of animals all on the screen at the one time. Data are overlapped on the screen for such large pedigrees, but in one mode an individual's information is highlighted as the mouse cursor passes over. You can ask to find an animal(s) by identity, or by merit or merit range for a given trait. The pedigree viewer shows the structures for many pedigree types, including: Manifest, or "This is what I can show", which shows only animals with a known sex Destructured, which shows the lines from fathers to sons Source-destined, which shows the lines from sires to daughters Individual, which shows the lines for individuals Chronological, which shows the lines in a time order. (Add the -T in the options) Enumerated, which shows the lines with a structure of 1 to 31. (Add the -E in the options) Short Name, which shows lines with an abbreviated structure of only first name. (Add the -S in the options) It also supports the following ways of showing lines on the screen: Purple, which shows the names of a pedigree in purple Black, which shows the names in black Hue, which shows the names with different colors according to the pedigree type Inherited, which shows the inherited line Upper, which shows the upper-case line of a name Color by merit, which highlights names which stand out Color by merit range, which highlights names by merit range Color by merit for all animals or all parents, which highlights names which stand out Color by merit for all parents, which highlights names by merit range. The -P option is the option for a numerical pedigree. It does not show the pedigree relations to the sire. (Add the -P in the options) For example, the pedigree file for the pedigree in the example below can be viewed as: The pedigree viewer may help you find the animals of interest in your pedigree.
